EtherCHK kit: Test up to 10G in the field faster than ever before.

Easy-to-use and portable, the EtherCHK kit includes all test options needed to test **RFC2544** and **EtherSAM (Y.1564)**. The kit also includes **EtherBERT, Traffic Generation and Monitoring (TGEN)**, dual port testing, and physical cable test.

EtherCHK kit: It is an all-in-one solution to maximize your field technicians' tasks!

EtherSAM

Model	Description	Price
EtherCHK-1G	Ethernet testing from 10M to 1G	$3,400
EtherCHK 1-10G	Ethernet testing from 10M to 10G	$6,495

Key features and benefits:

– Custom-designed platform with 64 GB of onboard memory, including a micro SD card interface (massively expand the memory)

– Ultra-bright 8-inch multitouch screen

– Built-in connectivity—choose between Gigabit interface, optional WiFi/Bluetooth, and 3G or 4G LTE via USB dongle

– Lightweight and portable solution designed for field engineers or cell technicians installing, troubleshooting and maintaining backhaul or Carrier Ethernet networks

– Dual-port testing up to 10G

– EtherSAM, RFC 2544, TGEN, EtherBERT, Through mode, smart loopback, cable test and second-port loopback tool
