TestFlow—Cloud-based field test management solution

EXFO

Smarter
network
in sight.

Did you know?

Technicians may spend 50% of field time just entering data. It sometimes takes days to validate and share test results. This means that field jobs cannot be closed quickly and efficiently. Moreover, the manual aspect often entails costly repeat jobs. Managers lack efficiency data to make optimal business decisions.

What's missing is a solution that ensures 100% compliance and gives you real-time visibility into each field job. We fixed that.

Meet TestFlow

TestFlow comprises four key building blocks to guide any project stakeholder through a streamlined process, saving time and money.

| Job management	Field testing	Post processing	Analytics
Pre-defined jobs and MOPs	Automated testing and result uploads	Automated close-out packages	Real-time visibility over results

The TestFlow process

Whether you are a field technician, a site lead or a project manager, you can benefit from TestFlow.

1 DEFINE & ASSIGN
Create digitized jobs and distribute to technicians/users.

2 TEST & UPLOAD
Automate test application configuration and auto-upload results

3 REPORT
Centralized access to results and custom report templates.

4 VALIDATE
Automate validation of results; find issues in seconds, not hours.

5 ANALYZE
Verify quality, compliance, efficiency and progress via insightful analytics dashboards.

TestFlow

Ensure 100% compliance | Right the first time | Automate reporting and batch auditing | Faster invoicing and deployments | Informed business decisions

From weeks to minutes with TestFlow

Significant time savings	85% on data entry	50% on field testing	80% on post-processing

Automatically slash admin time, ensure 100% compliance and complete jobs that would normally take you weeks **in minutes**.

Choose your plan

Choose the subscription-based plan that best meets your needs.

	PLUS For subcontractors and SME contractors	ULTIMATE For contractors and telecom operators
Centralized job management	✓	✓
