

Trouble-free broadband activation **IN ONE CLICK**

Meet the **FIP-200 Connector Checker™**

THE NEW
FIP-200
CONNECTOR
CHECKER™

Purpose-built for activating broadband services. A handy, entry-level tool that is easy to carry and easy to use, the FIP-200 allows any technician to check connectors in a one click.

Super easy to use

Affix it to a connector, press the button, get the result. No setting or configuration required.

Purpose-built

Pass/fail thresholds adapted to FTTH activation, featuring a 5-bar rating to avoid unnecessary connector handling.

Easy to carry

Sleek shape for technicians on the move and comes with EXFO's proven field ruggedness.

EXchange

Paired with EXFO's leading test instruments, EXFO Exchange is a secure cloud-hosted solution that drives an entire ecosystem to share test results, ensure compliance and unlock insights.
