

Advanced OTDR Testing

This half-day course is a continuation of EXFO's FE-1033 – Introduction to OTDR Testing, and covers advanced OTDR analysis functions, as well as the post-processing tools related to OTDR testing. Attendees will learn how to use the time-saving features of EXFO's OTDRs as well as the FastReporter 2 batch-processing analysis software.

Content

- › Gainers
- › Bidirectional analysis function
- › Echoes and ghost reflections
- › Overview of intelligent Optical Link Mapper (iOLM)
- › Template OTDR traces and Template Mode
- › Batch processing using FastReporter 2 software
- › Report generation using FastReporter 2 software

Prerequisites

- › EXFO's FE-1033 – Introduction to OTDR Testing

Methodology

The first part of this course consists of lectures using PowerPoint presentations and demonstrations, while the second part consists of specific hands-on OTDR testing exercises and experiments on bidirectional analysis, Template mode, iOLM, FastReporter 2 batch processing and FastReporter 2 report generation.

Documentation

Attendees will receive a binder containing copies of presentations and other handouts.
