

SHIFT TO HYPERDRIVE

Reliable tests, faster.

EXFO

Accelerating lab to field for next-gen optics

How can we support your end-to-end processes?

One-stop shop

for expertise and solutions in optimizing R&D and manufacturing.

Faster response time

Comprehensive, end-to-end testing for cost savings and faster time-to-market.

Seamless integration

with your existing processes.

Protecting your investment

through industry-leading test solutions that deliver optimal value now and for the future.

Customized solutions

as needed, designed through industry collaborations.

Repeatable and accurate results

Automated solutions, delivering repeatable and accurate results to support high-volume manufacturing.

The proof is at OFC: EXFO and partner booths

- 9 joint demos including OIF and Ethernet Alliance
- Optical components and PIC testing solutions
- End-to-end transceiver testing
- Testing solutions compliant with 400G/800G
- Advanced testers for the field

EXFO speaking sessions (March 9)

- PIC workshop - **PIC ECO chain: scalable solutions at every stage** with Lawrence Van der Vegt (San Diego Convention Center Room 29 - 5:30 p.m.)
- BAsE workshop from Broadband Forum - **Coax to fiber: how to close the expertise gap in the field?** with Guillaume Lavallée (San Diego Convention Center Room 28C - 10 a.m.)

Book a meeting with our experts at OFC 2022, booth #4517!

Joint demos showcasing comprehensive solutions

About EXFO

EXFO develops smarter test, monitoring and analytics solutions for the global communications industry. We are trusted advisers to fixed and mobile network operators, hyperscalers and leaders in the manufacturing, development and research sector. EXFO provides leading end-to-end test & measurement ecosystems, with future-proof solutions that integrate seamlessly with customer processes for fast, accurate, and automated results.

The communications industry's test,
monitoring and analytics experts
