1 Introduction

The CD-4000 Clock Data Recovery is an optical/electrical box for 28/56 GBd.

Key Features

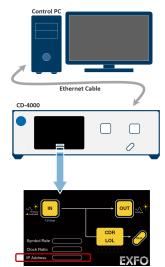

- ➤ Supports NRZ and PAM4 signals
- ➤ Integrated O/E with optical splitter (optional)
- > Supports singlemode or multimode
- ➤ Ultra low random jitter
- ➤ Auto-locking
- ➤ Can test 400G transceivers

Getting Connected

To power on and get connected:

- **1.** Connect the Ethernet cable from the control PC to the RJ45 port on the rear of the CD chassis.
- **2.** Push the power button on the front panel to initialize the CD-4000.
- **3.** Wait for initialization including checking receiver, detecting network, etc. Once initialization is complete, the IP address appears.

Note: If the IP does not appear after 5 min, it means the instrument is NOT yet connected to any network.

Please check the cable and RJ45 ports, and consider the following actions:

- ➤ If loose connection, then reconnect.
- ➤ If broken cable, then replace.

CD-4000

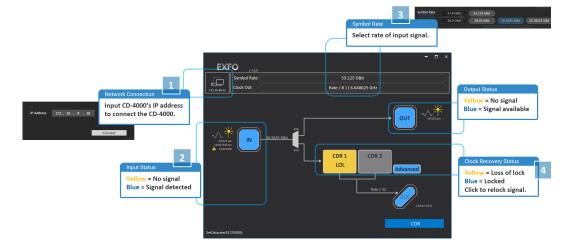

Clock Recovery Procedure

To start the clock recovery:

- 1. Input the CD-4000's IP address and click Connect button.
- 2. Connect data signal to Optical IN port.

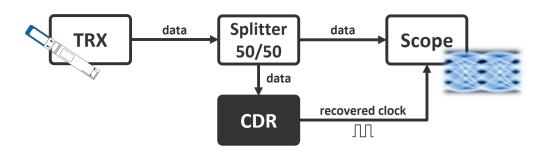

- 3. Select symbol rate of data signal.
- **4.** Click **CDR** button to lock data signal and recover clock.
