

# Introducing the FIPT-400-MF

NEW

## Automated multifiber inspection tip for MF-ready wireless probes

Turn your Android™ smart device into an automated multifiber inspection solution designed to easily access and inspect recessed multifiber connectors, including MPO and MTP®, in dense panels.

- ✓ **Automated and fumble-free**  
Automatically inspect multifiber connectors without the hassle of manipulating scanning knobs.
- ✓ **Right the first time**  
No repeats, no missed fibers, no confusion. View and validate all fibers on the first try.
- ✓ **Find dirty connectors—fast**  
Inspect quickly and easily with this tool designed for dense panels. No more excuses for blind connections!

With just one MF-ready probe, cover all single-fiber and multifiber inspection needs.
